New 943 Area Code is Coming to the 404/470/678/770 Region in the Greater Atlanta Area

March 8, 2022 – (ATLANTA) With new telephone numbers in the greater Atlanta area in high demand, the Georgia Public Service Commission approved the implementation of the new 943 area code to overlay the existing 404/470/678/770 region, which serves the metropolitan area of Atlanta and surrounding communities such as Alpharetta, Duluth, Dunwoody, East Point, Forest Park, Gainesville, Griffin, Lawrenceville, Mableton, Marietta, Peachtree City, Roswell, Sandy Springs, Smyrna and Tucker.

Starting on **March 15, 2022**, customers in the 404/470/678/770 area code overlay region may be assigned a number in the new 943 area code when they request new service or an additional line. The 943 area code will co-exist everywhere in this region with the 404, 470, 678 and 770 area codes. Customers receiving a 943 area code will be required to dial the area code and phone number for all local calls, just as customers with numbers from the 404, 470, 678 and 770 area codes do today.

Telephone customers should know the following key facts about the 943 area code overlay:

- Telephone numbers, including current area code, will not change.
- The price of a call, coverage area, or other rates and services will not change due to the overlay.
- What is a local call now will remain a local call.
- Customers in the overlay region will continue to dial 10 digits for local calls within and between the overlay area codes, and 1+10 digits for long distance calls.
- Customers can still dial just three digits to reach 911, as well as 211, 311, 411, 511, 611, 711 or 811 if those are currently available in their community.

**470, 678, 770
& 943 NPA**

**404, 470, 678,
& 943 NPA**

Customers should continue to identify their telephone number as a 10-digit number (3-digit area code + 7-digit telephone number), and include the area code when giving the number to friends, family, business associates, customers, etc.

Customers should ensure that all services, automatic dialing equipment, or other types of equipment recognize the new 943 area code as a valid area code and should continue to store or

program telephone numbers as 10-digit numbers. Some examples include but are not limited to: stored telephone numbers in contact lists in wireless or cordless phones, PBXs, fax machines, Internet dial-up numbers, speed dialers, call forwarding settings, voicemail services, medical alert devices, safety alarm security systems and gates, ankle monitors, and or other similar equipment. Customers should also ensure their websites, personal and business stationery and printed checks, advertising materials, contact information, and personal or pet ID tags include the area code.

For more information, please contact **your local telephone service provider** or visit the Georgia Public Service Commission website at <https://psc.ga.gov/about-the-psc/consumer-corner/telephone/general-information/area-codes/>.
